

# Interdisciplinary Approach to Dental Implants

In Association with **Vancouver Dental Specialty Clinic**

Thursday, September 28, 2017

## PROGRAM DESCRIPTION

The dental patient has been replaced by a dental consumer looking for proven, predictable solutions. Tooth loss and replacement pose both physical and emotional effects on patients. Early detection is key when treating any disease process. Understanding indications for treatment and effectively communicating benefits while managing expectations are critical in delivering predictable outcomes. Collaboration among the entire dental team strengthens the knowledge of case selection, case presentation and ultimately case acceptance. This session identifies the true impact of the interdisciplinary approach to improve the treatment outcome.

## LEARNING OBJECTIVES

- Discuss controversial issues in implant dentistry.
- Increase case acceptance through effective communication.
- Learn how to prevent and manage peri-implantitis.
- Learn how to develop more ideal restoration through a team approach.

**ADA CERP**® | Continuing Education Recognition Program

Straumann is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

## SPEAKERS

**Dr. Faranak Zaeimdar** is a Board Certified Specialist in Prosthodontics and is the founder of Vancouver Dental Speciality Clinic. She has a position as a lecturer, clinical assistant professor and consultant prosthodontist in the Department of Oral Health Sciences, Division of Prosthodontics and Geriatrics in the faculty of dentistry of the University of British Columbia. She was awarded a Diploma in Prosthodontics and a Masters of Sciences, in Craniofacial Science for her research on bonding to the e. max ceramics from UBC. She is a fellow of Royal Collage of Dentist Of Canada.

**Dr. Oxana Korj** graduated from the University of British Columbia, Vancouver, with her Doctor of Dental Medicine in 2011. Following graduation, Dr Korj enjoyed a year of general dental practice in Yorkton, Saskatchewan. She then completed a four-year residency program in Oral and Maxillofacial Surgery at the Washington Hospital Center, Washington, DC. Dr Korj is now a board certified specialist in Oral and Maxillofacial surgery practicing in the province of British Columbia. The focus of her practice is on implant surgery and bone regeneration techniques, as well as broad range of dentoalveolar surgery, provision of sedative anesthesia and management of medically complex patients. She also dedicates her time as a clinical assistant professor at UBC Faculty of Dentistry.

**Dr. Mehdi Noroozi**, Canadian fellowship qualified and board-certified specialist in Periodontics, attained his Doctor of Dental Surgery degree from the University of Toronto, Canada. After several successful years in private practice, he completed an intense three-year surgical specialty residency at the University of British Columbia in Vancouver, where he received extensive training in contemporary treatments of periodontal diseases, cosmetic oral plastic procedures, dental implants and reconstructive surgeries leading to a Masters degree in craniofacial science with focus on dental implantology, as well as a specialized diploma in postgraduate periodontics and implant surgery.

**Dr. Jeffrey Coil** received his undergraduate, dental and doctorate degrees from UBC, and his Graduate Endodontic training at the University of Washington. He is an editorial consultant for the CDA Journal and on the Scientific Advisory Board for the Journal of Endodontics. He mentors the Northwest Endodontic Study Club and Seminar, and is Director of the Graduate Endodontics Program at UBC.
